GIRLS' DAY AT PARAT

AS A REGIONAL EMPLOYER, PARAT IS ADVOCATING FOR APPRENTICESHIPS WITH A FUTURE

As a globally active plastics expert and manufacturer of premium tool cases, PARAT Group campaigns for technical careers in the industrial sector in its role as a regional training company. This year, within the framework of the nationwide Girls' Day, PARAT once again offers interested young girls from the region exciting insights into the working worlds of technology. The participants get a very close experience of plastics know-how at the market leader and can check out the wide range of technical apprenticeships at PARAT.

After an extensive tour of the company, the trainers Stefanie Mauritz and Horst Fenzl focused on the presentation of the various training opportunities and career prospects in technical fields at PARAT. With a broad spectrum of technical apprenticeships, such as industrial and tool mechanic, process engineer for plastic and rubber technologies, production mechanic or electronics engineer for operational technology and mechatronics engineer, PARAT provides an opportunity for young talented girls of tomorrow to reach above the ordinary. PARAT's program on Girls' Day offered them the possibility to assist and get involved with production activities and to put their technical skills and abilities to the test. Under the guidance of the trainers and apprentices Alina Wensauer, Benjamin Prosser and Jonas Kasberger, the girls worked hard to create their very first work piece: a hand-made aluminum cube machined from casting blanks, which they first marked off, center-punched, drilled and finally rasped with a lot of passion and eagerness.
